DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 28May2010 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 28May2010 has been considered by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 10-14, 17, 18, 22-29, 35, 36 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gribbon et al (1996).

At least one embodiment of the claims are drawn to a method for preserving an agent comprising: a) dissolving an agent in trehalose at a concentration of between 1% and 50% w/v; b) subjecting (a) to temperature and pressure conditions such that (a) loses solvent by evaporation without freezing or bubbling, wherein said agent retains at least 40% of antigenicity/activity compared to a reference agent not subjected to steps (a) and (b).

Gribbon et al teach a method for preserving an agent comprising: a) dissolving an agent in trehalose or sucrose at a concentration of between 1% and 50% w/v; b) subjecting (a) to temperature and pressure conditions such that (a) loses solvent by evaporation without freezing or bubbling (page 138, section "Trehalose stabilization"; pages 140-142, sections "Q-T4 Drying and Stabilization in Trehalose" and "Q-T4 stabilisation and novel drug delivery systems"; Figure 1).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-9, 15, 16 19-21, 3—34 and 37-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are dependent from rejected claims.

Conclusion

5. No claims are allowed.
